

THINK TO SAVE our ENVIRONMENT

SAVE OUR RESOURCES - SAVE MANKIND

"WORLD ENVIRONMENT DAY"

5TH, JUNE 2013

Some ways to avoid Pollution & safe guard our Environment :

Reduce consumption of fossil fuels-petrol, diesel & CNG.	THINK of car pooling Take a walk at short distance. Use Unleaded Fuel.
Conserve water resource-minimize water wastage in domestic / public / industrial use.	THINK of low flow/dual flashing devices/fixtures.
Use of recycled treated waste water for Gardening & save up to 80%	THINK for STP & ETP systems.
Conserve and Recharge Ground Water.	THINK for Rainwater Harvesting in large building/Industrv.
Control pollution of our rivers, streams pond & other water sources.	THINK of mother rivers and their triboterics, Lake, Ponds, Canals. Do not discharge effluent, sewer and solid waste directly into them.
Avoid wastage of Electricity & Power.	THINK of LED/CFL/SOLAR lighting for domestic & public building and reduce the demand up to 80%
Implement Energy audit for industries & commercial sites.	THINK of Environment Management Plan and go for Environment Grading.
Construction of eco-friendly green buildings.	THINK of maximized solar gains and ventilation while plotting and design.
Segrsgate organic waste and recyclable waste at home.	THINK of composted organic fertilizers for your crops and to generate energy from waste.
Pledge to plant / adopt a tree today.	THINK of tree belt in front of your house that can control traffic noise and dust.
Conserve your local vegetation and native tree species.	THINK of minimum use of water for landscaping
Increase in the use of Bio - Fertilizers / Organic pesticides for agriculture.	THINK of improved crop yield and soil fertility.

*We all can contribute in our small way by following a few of the suggestions in daily life
This in turn will make our Environment more livable & healthy.*
